

ABSTRACT OF THE DISCLOSURE

5

ISOCYANATE-BASED COMPOSITIONS, USE THEREOF  
FOR MAKING COATINGS, ESPECIALLY ADHESIVES,  
AND ALIPHATIC ADHESIVE JOINTS THUS OBTAINED

10

The invention relates to the use of an emulsifiable  
isocyanate composition in adhesives. The composition  
comprises an isocyanate composition, with a mass  
content of N=C=O functions of 10 % to 30 % and a  
15 viscosity of at most 1,500 mPa.s., a detergent agent,  
with a principal component of a compound or a mixture  
of compounds of general formula:  $R; 20-(CH; 2-CH; 2-O);$   
 $s-CH; 2-CH; 2-X'; q-P(=O); m(O; -); p-X-CH; 2-CH; 2(-O-$   
 $CH; 2-CH; 2); n-O-R; 1,$  where  $p =$  between 1 and 2  
20 (closed intervals, in other words inclusive limits),  $m$   
 $= 0$  or 1, where  $p+m+q = \max. 3, 1+p+2m+q = 5,$  X and X' =  
O or a simple bond, n and s independently = 5 to 25, R;  
1 and R; = independently or preferably the same  
aliphatic group not having an aromatic nucleus. The  
25 above is of application to the adhesive industry.
